Public Notice:
Proposed No Further Action Determination

Chevron
400 South Colfax Way
Placer County, CA

The Central Valley Regional Water Quality Control Board (Central Valley Water Board) invites public comment regarding the intent of the Board to grant regulatory closure for the leaking underground storage tank (UST) case at the Chevron located at 400 South Colfax Way in Colfax, California (Site).

In 1990, C. L. Prince Company, Inc (Prince) discovered petroleum hydrocarbon impacted soil at a damaged product line. In 1991, Prince removed five USTs and all associated product lines and installed a new UST system. Since April 2004, Prince has monitored petroleum impacts in groundwater at eight on- and off-Site groundwater monitoring wells. Between 2011 and 2016, Apex Envirotech Inc. (Apex) operated a dual phase (water and soil vapor) extraction system removing approximately 11,200 pounds of petroleum hydrocarbons and approximately 250,000 gallons of petroleum hydrocarbon impacted groundwater. The petroleum hydrocarbon plume extent in groundwater is limited to the property boundary.

Based on Site data, Apex prepared a request for regulatory closure on behalf of Prince, the Site property owner. In that request, Apex indicates that Site data meet the closure criteria presented in the State Water Resource Control Board's *Low-Threat Underground Storage Tank Case Closure Policy*.

Central Valley Water Board staff reviewed the request for regulatory closure and, based on the data collected to date, believe there is merit to this request. As such, the Central valley Water Board is conducting a public participation period that allows interested parties to comment on the proposed case closure. This Public Notice is being provided to you because your property, place of residence, or work is located within approximately 200 feet of the Site as shown on the attached map. After October 9, 2021, Central Valley Water Board staff intends to complete its closure review process and close this former leaking UST case.

Public Comment Period: August 5, 2021, through October 9, 2021

FOR MORE INFORMATION

Additional information is available on the [State Water Resources Control Board's Geotracker website](http://geotracker.waterboards.ca.gov/) (<http://geotracker.waterboards.ca.gov/>). Please contact Kyle Johnson with the Central Valley Water Board if you have any comments/questions regarding the 400 South Colfax Way release, the cleanup activities at the site, or any of the information in this Fact Sheet:
